

EnviroGLAS Announces Extensive Recycled Glass Product Line

For Release July 21, 2004

EnviroGLAS Products, Inc. of Plano, TX today announced an extensive recycled glass product line featuring beautiful epoxy resin terrazzo applications. With the look of vivid gems embedded in a seamless, glossy finish, the 100% post-use glass and epoxy surface is a perfect fit for organizations looking to combine aesthetics with sustainability. The fully customized floor and countertops recently completed for the Highland Park Village Starbucks sparkle with EnviroGLAS and EnviroBLUE aggregates in three colors of epoxy resin.

“We’ve created a series of products that convert would-be trash bound for the landfill into elegant, durable, environmentally friendly surfaces,” said EnviroGLAS Products Inc. president Tim Whaley. “I invite everyone in the market for permanent flooring to compare our product line to any other seamless flooring option. What they’ll find is that we come out on top, with the added benefits of unique beauty and ecological sustainability.”

EnviroGLAS® Products Inc

PRODUCT DESCRIPTIONS

Crushed post-consumer and post-industrial glass is added to color-pigmented epoxy resin and poured in place to create an exquisite terrazzo application for flooring, counters and tabletops. Epoxy color is customizable to match any color swatch. These beautiful 100% recycled glass surfaces are USGBC LEED® conforming and low maintenance, with a life cycle of over 40 years. Sized 5/8" inch down to 1/8" inch EnviroGLAS® aggregate also adds shimmer to landscaping designs, aquariums, and artistic creations.

- **EnviroGLAS®** *Recycled mixed bottle glass aggregate*
- **EnviroPLATE** *Recycled window plate glass aggregate*
- **EnviroBLUE** *Recycled cobalt blue glass aggregate*
- **EnviroGREEN** *Recycled green glass aggregate*
- **EnviroBROWN** *Recycled brown - amber glass aggregate*
- **EnviroCLEAR** *Recycled flint glass aggregate*
- **EnviroFLECT** *Recycled mirror glass aggregate*
- **EnviroSAND®** *Recycled glass sand aggregate*

Pulverized 100% mixed post-consumer recycled glass granules add sparkle and splash to landscape designs, golf sand traps, indoor or outdoor displays with a beach theme, and even coastal beaches.

- **EnviroGLO** *Photo luminescent glass*

Crushed post-use recycled glass is added to color-pigmented epoxy resin and sprinkled with 'after-glow' photo luminescent pigment. EnviroGLO absorbs ultraviolet, lamplight, sunlight and other visible lights within 10 minutes. EnviroGLO has the ability to glow for up to 10 hours or more after exposure to light energy. Photo Luminescent Pigment is non-toxic and harmless to humans, as well as free from radioactive additives. Excitation and emission can be repeated over and over.
