

## **EnviroGLAS Unveils New Recycled Glass Countertop Slab**

*EnviroGLAS Products Inc.  
For Release March 8, 2005*

EnviroGLAS Products, Inc. of Plano, TX today unveiled a unique decorative surface countertop product dubbed EnviroSLAB™. A standard 25" x 60" x 1" size countertop, EnviroSLAB brings exquisite 100% recycled glass terrazzo into an affordable price range for anyone remodeling or constructing decorative surfaces and countertops. With eight glass options and fully customizable pigmented epoxy resin, the color possibilities are endless!

Now the look of vivid gems embedded in a seamless, glossy finish -- previously only crafted on site -- can be custom manufactured for a price of \$400. Shipping, fabrication and installation are not included. Combining aesthetics with sustainability, EnviroGLAS® Terrazzo is an inert, odorless, easy to clean, seamless durable hard surface. Anyone interested in seeing EnviroSLAB in action can visit the Starbucks in Highland Park Village, Texas, where the countertops and floors sparkle with mixed color EnviroGLAS and EnviroBLUE™ Terrazzo.

"We're very excited about EnviroSLAB because it makes our environmentally friendly countertops more accessible to the buyer," said EnviroGLAS Products Inc., Principal Tim Whaley. "I invite anyone in the market for a decorative surface countertop to compare EnviroSLAB to other similar options. EnviroSLAB outperforms the competition, while offering the additional benefits of unique beauty and ecological sustainability."

EnviroGLAS® Products Inc. converts post-consumer and industrial glass bound for the landfill into elegant, sustainable and ecological hard surfaces and landscaping materials. A recent independent analysis found that of the 69 LEED points available, EnviroGLAS Terrazzo can contribute to seven or more.
