

Maintenance of EnviroMODE™ porcelain terrazzo products

EnviroMODE polished porcelain terrazzo is easy to maintain. After sweeping up loose debris, simply clean with a pH balanced, non-soap based, preferably biodegradable, cleanser such as Orange Clean cream cleanser mixed into warm water. Typical cleaners like Mr. Clean, Windex, Fantastic, 409, Lysol and Spic 'N Span are also suitable. Then rinse with clean water.

Drying will increase the shine and prevent water spots, but is not required.

For EnviroMODE tile, clean the grout every 2 months or so to eliminate and prevent mold and mildew. Apply an environmentally friendly cleaner like Grout-Ox that uses oxygen foaming action. After allowing the cleaner to soak, use a brush for tough spots and then rinse with water.
